General staff and pupil advice on limiting the spread of coronavirus in the Educational Setting

Government advice is clear PPE, including facemasks should be taken into account where employees could be put at risk. The use of such PPE does not replace or reduce the need to follow the government guidance in relation to hygiene practices

Frequently clean and disinfect objects and surfaces that are touched regularly, using your recommended cleaning products.

- Wash your hands with soap and water often – do this for at least 20 seconds.
- Use hand sanitiser gel if soap and water are not available.
- Staff and Pupils should wash their hands as soon as they get to school and when they arrive home, after they blow their nose, cough or sneeze, before they eat or handle food.
- Cover mouth and nose with a tissue or a sleeve (not hands) when you cough or sneeze.
- Put used tissues in the bin immediately and wash your hands afterwards.
